## READING

**10- Abdul is a twelve-year-old boy who lives in an area of Bangladesh which floods regularly. Read his school composition below. Are the sentences T(true) or F(false)?**

### The Best Day of My Life

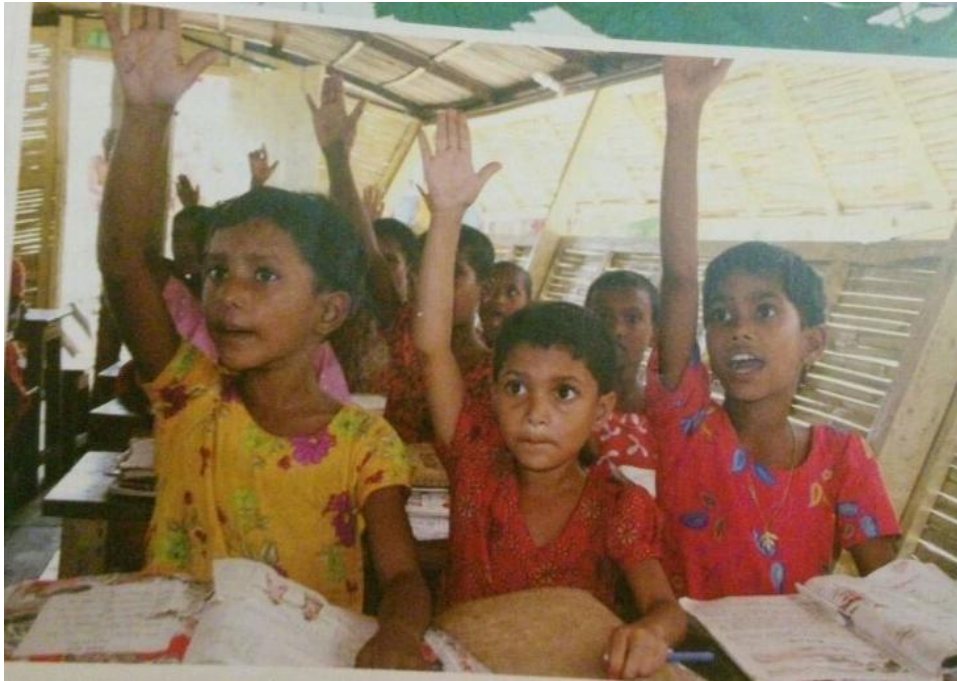

I'm so excited! It was the first day of term today. Last year we couldn't get to school on many days because of the floods. Sometimes it was weeks. When I got back to school, I realized I didn't remember much. It was very frustrating because I want to study to be an architect when I'm older. If I miss school all the time, I will never be an architect. Our father told us the situation was getting worse.

But on this day of my life, everything was different. The best day: the school boat was coming! From now on it was going to come every day except Sunday and stay for three hours. My little sister, Maki, and I were ready an hour before it arrived.

Suddenly we could see the school boat and we all cheered loudly! We lined up as we were told and walked on board respectfully. We were so happy to be there! There were forty seats on the deck for us older children, and benches for twenty little ones. We had books and pens and there were even solar-powered computers and a library for students older than us. The three hours passed so quickly that I could not believe it when it was time to go home again.

But the best was not yet over! Each of us got a solar lamp to take home so we could do homework. Before, we could never do any school work at home because our kerosene lamp was too expensive, and it also polluted the air and made a nasty smell.

Now I really do believe I will be able to study and become an architect. Then I will design more boats for our people, not just school and library boats, but for living in and for floating gardens where we could grow crops.

1 Last year Abdul couldn't go to school because of the extremely hot weather. \_\_\_\_\_

2 Abdul realised that after a long time without going to school he remembered the things he learnt. \_\_\_\_\_

3 The school boat was a good solution to the kids' education problem. \_\_\_\_\_

4 The children stayed at school for 3 hours. \_\_\_\_\_

5 Abdul did not like the idea of having a solar lamp to do homework at home. \_\_\_\_\_

6 Abdul thought building other types of boats would also help to make Bangladesh people's lives easier. \_\_\_\_\_
